\*Low precision; no estimate reported.

NOTE: Some 2010 estimates may differ from previously published estimates due to updates (see Section B.3 in Appendix B of the *Results from the 2011 National Survey on Drug Use and Health: National Findings*).

<sup>a</sup> Difference between estimate and 2011 estimate is statistically significant at the 0.05 level.

<sup>b</sup> Difference between estimate and 2011 estimate is statistically significant at the 0.01 level.

<sup>1</sup> Respondents with unknown data were excluded.

<sup>2</sup> Respondents were able to select multiple categories of persons that they would talk to about a serious problem, including the choice of "nobody." Respondents who reported both a person that they would talk to and that they had nobody to talk to were excluded from the analysis.

<sup>3</sup> Special occasions, such as weddings, funerals, or other special events, were not to have been considered in the number of times attended religious services.
